Auction Schedule

Continuous Trading with three Auctions (in CET)

One-Auction-Only

- Auctions have a random end. Times stated are the earliest times of the end of an auction.

Please note: On the last trading day of a year different trading times apply. These times are published in the correspondent announcements.
On Eurex settlement days the intraday auction for DAX stocks has a duration of 5 instead of 2 minutes.
All times are an approximation. Timestamps are meant as the earliest timestamp for the explicit trading phase change. Relevant are the trading phase changes in the trading system for Xetra
